

CHAPTER 2

Literature Review

Academic Presentation

Understanding existing knowledge, prior work, and the gap this research fills

2

WELCOME

Welcome

Thank you for joining this presentation on the Literature Review. This chapter reviews existing knowledge, compares earlier work, and shows the gap that this research aims to fill.

By the end, you will understand the theory behind the study and why the research is needed.

IN THIS CHAPTER

- 2.1 Introduction
- 2.2 Theoretical Background
- 2.3 Related Work
- 2.4 Research Gap
- 2.5 Summary

Introduction

Short intro to the chapter

1

Purpose

Explain what the literature review covers and why it matters for the study.

2

Scope

State which topics, time periods, and types of studies are included in the review.

3

Sources

Mention the main sources reviewed: journal papers, conference papers, books, and reports.

4

Roadmap

Outline how the chapter is organized: background, related work, research gap, and summary.

WHY REVIEW THE LITERATURE?

Context

Places your work within existing knowledge.

Avoid Duplication

Shows what has already been done.

Justification

Supports the need for your study.

Theoretical Background

Relevant theory, definitions, and models

1

Key Definitions

Explains the important terms and concepts used throughout the study.

Tip: define each core term where it first appears.

2

Relevant Theory

Presents the established theories that support and guide the research.

Tip: connect each theory to your research question.

3

Models & Frameworks

Describes the models and frameworks that other researchers rely on.

Tip: show which model your work builds on or compares against.

The theoretical background gives readers the knowledge needed to understand the rest of the study.

Related Work

Existing methods and prior research

1

Group by Theme

Organize studies by topic or approach rather than one by one.

Why: reveals patterns across studies.

2

Summarize Methods

Describe the methods and data that earlier studies used.

Why: shows how problems were tackled.

3

Compare Results

Compare findings, strengths, and performance across studies.

Why: shows what works best.

4

Note Limitations

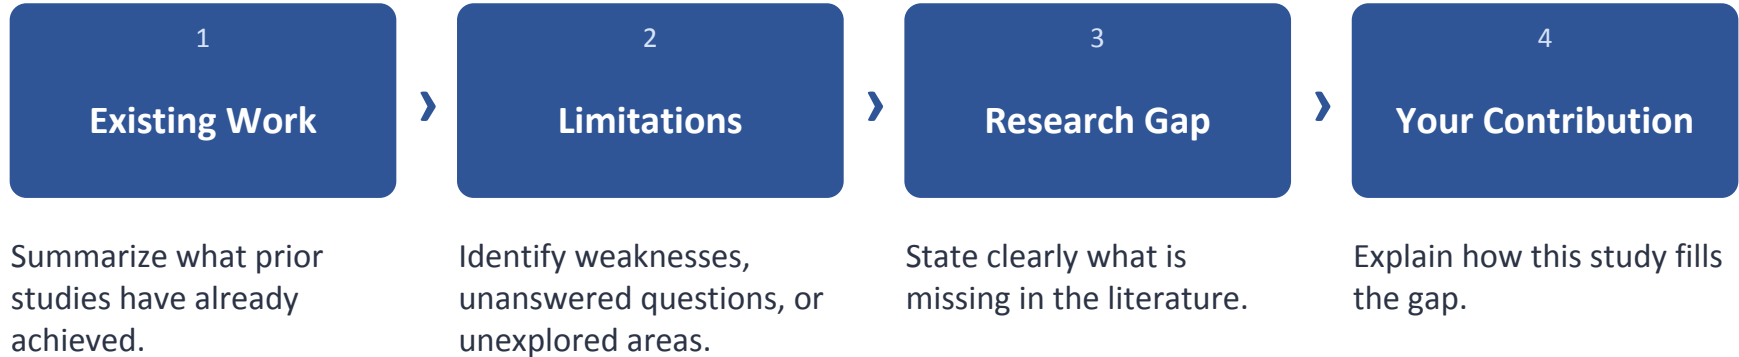

Point out weaknesses, assumptions, and unresolved issues.

Why: leads directly to the research gap.

Discuss prior research critically: analyze and compare studies instead of only listing them.

Research Gap

What is missing in the literature

A clear research gap justifies why the study is needed and leads to the research objectives.

Summary

Short wrap-up of the chapter

1

Introduction

The chapter set out the purpose and scope of reviewing existing literature.

2

Theoretical Background

Key definitions, theories, and models provide the foundation for the study.

3

Related Work

Prior methods and research were compared, showing their strengths and limitations.

4

Research Gap

The missing pieces found in the literature justify the present research.

Thank You

Questions & Discussion

Chapter 2 | Literature Review
